POLICY NUMBER HO-2022-FX-02199	DATE OF INCIDENT 2026-03-12
DESCRIPTION OF INCIDENT I returned home on March 12, 2026 from a three-week trip to discover that my cat, Mr. Whiskers, had chewed through the flexible water supply hose connecting to the dishwasher under the kitchen sink at my insured property (412 Birch Hollow Ln, Eugene, OR 97401). My pet sitter visits twice a day to feed him but does not typically open the under-sink cabinet, so the chewed hose went unnoticed. Water had been slowly leaking from the damaged hose into the cabinet base and out onto the kitchen floor for at least 24–36 hours before my neighbor noticed water seeping under the front door and called me. By the time I shut off the main supply, approximately 95 sq ft of laminate flooring in the kitchen and the lower drywall along the east kitchen wall were saturated, with visible warping, delamination at the seams, and dark water staining. Mr. Whiskers was located safely behind the refrigerator, dry and unharmed. Riverbend Damage Restoration was contacted on March 13 for emergency drying and assessed the full scope of repairs. Photos and an itemized repair estimate are attached.
